the burning suplight, that was all. Ten o'clock rolled around and there was a knock at the door. It was probably the agent to put her out -her and the babies, and the mother's heart stood still with a sudden overwhelming sense of what it all meant. A second knock came and she answered with faint, " Come."

that it was only 10 o'clock when I knocked at

the door of room 13, knocked again and heard a faint reply, " Come." The room was almost hare of furniture. Unlike many tenement-house apartments, it was scrupulously clean. The woman, who rose in bewildered surprise at my entrance, was weak and emactated. She had evidently done her best to keep her surroundings neat at least. On the one bed-which, by the way, stood in what intrinsic beauty 't could mus-

ter, quite unadorned by any bedding except a mattress, which was also emaciated—lay two babies, both asleeg. One was about six weeks old, the other righteen months.

A few questions drew out the sad story, and as she related it the hopelessness of the poor weman seemed to meit a little under the thought that some one was even suntciently interested to listen. When she was asked what she needed most she looked quite bank, however. She seemed quite incarable of thinking of buying several things allout my going down the stairs and out to the greery to get some absolute necessities.

TWO SMART BEARS.

Caught in a Log Trap, They Contrived to Carry It Off. Not long ago a cow died in the vicinity of the Guinn Ranch, near the head of Goose Creek, south of Wagon Wheel Gap. says the San Juan Prospector. It soon be-

and set near the dead cow, and the trappers went to bed laughing at the trick they had played on the bear. The trap was chained to a pole 18 feet long and 8 inches through at the large end.

In the morning an examination of the premises about the dead cow showed plainity that the bear and a cub had been there during the night. There was a large track eighteen inches long and six or eight unches wide, and a small track, evidently made by a cub. The trap, however, was gone and with it the 18-foot pole, and the disturbed condition of the ground showed conclusively that the bear had been caught in the trap. The trail, however, away from the scene was

trail, however, away from the scene was only the trail of two bears - there was not only the trail of two bears—there was not a mark of dragging either trap or pole.

Mr. Gunn took up the trail, which he followed eight miles without coming upon the bears, trap or pole. At the camp of Tom Carey, seven miles away, that man told how in the night he had been awakened by a sound of something walking, with an occasional pause and heavy fall on the ground as if something had been dropped.

heavy fall on the ground as if something had been dropped.

Having no gun, Mr. Carey sat in his tent the balance of the night and endeavored to keep warm by poking wood into a sheet-iron stove. The trail was followed a mile or so further and then lost. In one place the bears had passed through a neavy quaking aspen thicket, and had been been gather than the trap and pole were being taken along. The natural inference is that the bear was caught in the trap, had picked up the same, with the pole, and started for the hills. The bear is an old offender in these parts, and Mr. Guinn hopes to find it yet.

A man just in from the head of the San Jana reports that he passed the bears on the Pagosa road, beyond Suemitville, jogging contentedly along, each carrying one end of the pole, while the old bear was caught in the trap by the right front foot.
